08 February 2012

To all Family Physicians of Scandinavia,

RCGP Annual Primary Care Conference | 3 – 6 October 2012 | Glasgow, UK

It is with pleasure that I should like to invite all Scandinavian Family Physicians to our forthcoming Annual Primary Care Conference in Glasgow, 3 – 6 October 2012.

Now in its sixth year and firmly established as the *must attend* primary care event of the year for GPs and family physicians, the Conference has continued to grow with a greater number of delegates, exhibitors and a wider, more diverse programme, offering something for everyone. The Conference showcases the latest clinical and policy developments across the UK and brings together an impressive range of national and international speakers.

It also provides the College with an international forum for debate and an opportunity to update delegates on any new clinical, management and policy issues relating to primary care and general practice. This year's theme is *global general practice* where we shall be celebrating best practice in the healthcare services we deliver in the UK and welcoming international speakers and colleagues to learn about innovative practice in other parts of the world.

For detailed Conference information and registration options, please visit the website: www.rcgp.org.uk/annualconference.

I do hope you can join us in Glasgow.

Yours sincerely,

Yours sincerely
